Unstoppable Together.

## **Kidney Cancer Association Young Investigator Award (YIA)**

**Purpose:** Young Investigator Awards provide funding to promising young investigators to encourage and promote quality research in kidney cancer. Proposals should be projects that can be realistically accomplished in one year and should provide sufficient preliminary data that could lead to potential further funding through other granting mechanisms.

**Applicant:** Applicants must have a doctoral degree (MD, DO, Ph. D.) and hold an academic rank no higher than Assistant Professor (e.g. Instructor or Fellow)

All application materials will be submitted electronically in PDF format, in English, via <https://kidneycancer.submittable.com/submit>

All questions regarding the grant application process should be submitted to [grants@kidneycancer.org](mailto:grants@kidneycancer.org).

**Funding:** \$75,000

Funding will be distributed in full on October 7, 2021. The funding is to be used solely for research costs, with a maximum of 5% utilized for institutional indirect costs if necessary. The funding cannot be used for the investigator's salary support or things not directly related to the proposed research (travel, society memberships, etc.). The research award can be used to support the salaries of research personnel directly involved in the conduct of the research proposed.

### **Timeline for the Application and Granting Process:**

March 1, 2021:	Call for Letters of Intent
April 29, 2021:	Final Day to submit Letters of Intent
May 27, 2021:	Final Day that Meritorious LOI Proposals will be notified to proceed with preparation and submission of a full proposal for evaluation
July 15, 2021:	Final Day to submit Full Proposal for academic review
September 27, 2021:	The winning research teams will be notified and announced publicly
October 7, 2021:	\$75,000 distributed to award winners
October 7, 2022:	Final Progress Report Due

**Reviewers:** An independent panel of reviewers who are recognized experts in the field will be assembled to conduct a scored review of the letters of intent and the final proposals based on published NIH guidelines. This will include at least one pathologist, one geneticist, one urologist, and one medical oncologist, as well as patient advocates. Members with a conflict of interest on a given proposal will recuse themselves from the deliberation.

**Letters of Intent:** Applicants will submit a two page, single-spaced, Arial 11 font proposal in PDF format for review, inclusive of graphs/charts. Applicants will submit both unredacted and redacted (hiding all identifying information) versions. The proposal should include the following sections:

- Background Summary

**KidneyCancerAssociation™**

Unstoppable Together.

- Impact Summary
- Purpose/Objective of Study
- Brief Overview of Methods
- Lay Summary(200-word limit suggested)

**Accompanying Documentation:**

- Biosketch, with contact information
- One paragraph personal statement describing the applicant's background and commitment to kidney cancer research
- Relevant IRB-approved protocols for use of human or animal specimens in the proposed research
- Supporting documentation from a pharmaceutical company if a drug is proposed in the research plan
- Letter of support from a project mentor. For example, a senior member of the applicant's department or division chairperson
- Mentor's biosketch, with contact information

Applicants will be notified by email as to the status of their letter of intent by May 27, 2021.

**Full Proposals:** Meritorious applicants selected to submit a full proposal will submit < or equal to a 6 page, single-spaced, Arial font 11 document in PDF format. All relevant graphs, tables, and figures must be included within the 6 pages. The document should include:

- Background and work done to date
- Specific aims
- Methodology, including alternative methods should the primary plan go awry
- Potential impact on kidney cancer patient care
- Timelines and actionable goals of the research plan
- Budget and justification
- Cite relevant literature

Applicants should indicate whether or not their research proposal is under consideration by other granting mechanisms.

Proposals will be scored using the traditional NIH 1-9 system for:

- Significance
- Approach
- Innovation
- Environment
- Overall

Award winners will be notified by September 27, 2021, and initial funds will be dispersed by October 7, 2021.
