

Endowment

For 30 years, the KCA has witnessed changes in financial and economic trends throughout the United States and worldwide. The KCA leadership in the early years of the organization had the foresight to establish an endowment to allow our work to continue through any hardships, including a worldwide pandemic.

These funds provide a base source of research funding in perpetuity, providing long-term stability, fiscal responsibility, and financial viability. Giving to our endowment allows for sustainable research and continued programs and services for our future generations of patients. We invite you to make an endowment gift to allow for your generosity to be part of your legacy, as your impact through this endowment will continue for decades to come. **Should you wish to create your own lasting impact through a named endowment, please contact Kendall Pace Monroe at KMonroe@kidneycancer.org.**
