

WHO WE ARE

For more than 30 years, the KCA has stood for excellence in research and education as well as the thoughtful, patient-driven services we extend to the patients and caregivers who have placed their trust in us.

We are more committed than ever to being a global community dedicated to supporting and empowering patients and caregivers and leading change through education, research, and advocacy.

How We Help

Support and Empower • Educate • Research • Advocate

SUPPORT AND EMPOWER

We are dedicated to patients and caregivers, providing information, guidance, and supportive resources to all communities.

Patient Navigator Program

Receive one-on-one support from our Patient Liaison including help finding a specialist, questions during treatment, local support services, financial information, and more information about a diagnosis.

Just Diagnosed Toolkit

For newly diagnosed patients, our Just Diagnosed Toolkit is a step-by-step guide and includes a list of questions to ask your doctors.

Access more resources online to support and empower you and your family.

Contact the Patient Liaison for one-on-one support or request a printed version of the Just Diagnosed Toolkit. **+1-800-544-3KCA | patients@kidneycancer.org**

EDUCATE

As the first and largest kidney cancer advocacy group, the KCA is the only organization to promote scientific advances and education globally. The KCA provides opportunities for healthcare professionals through:

IKCS meetings are dynamic, multidisciplinary programs to discuss current trends and future directions in kidney cancer care. The KCA hosts IKCS: Europe in the spring and IKCS: North America in the fall.

Learn more about IKCS meetings at kidneycancer.org.

RESEARCH

The KCA's annual grant program funds innovative investigators pursuing high-impact research with the potential to improve kidney cancer treatment and care.

“Supporting talented researchers will help take the entire community to new heights of discovery that will move the needle in kidney cancer.”

Gretchen E. Vaughan

President & CEO, KCA

Apply for or read about our funded research at kidneycancer.org/research.

ADVOCATE

The KCA is active in legislative advocacy efforts, specifically by encouraging individuals to contact their congressional leaders through our letter-writing campaigns. Through our online advocacy portal, individuals write their representatives and the House Committee on Appropriations to advocate for more government-funded research.

As part of the Defense Health Research Consortium, we work to protect and enrich government funding for medical research programs. Government funding for kidney cancer has grown steadily from \$10 million in 2016 to \$50 million in 2021.

To join our advocacy efforts or to write your congressperson, visit kidneycancer.org/advocate.

Fast Facts

About Kidney Cancer

SYMPTOMS

Blood in the urine
Abdominal mass
Back or flank pain
Low blood count
(anemia)

Kidney cancer is about twice as common in men as in women
